EURONET AND DILLARD'S COOPERATE ON DEPARTMENT STORE ATMS

Leawood, Kansas, USA, November 10, 1999—Euronet Services Inc. (Nasdaq: EEFT) announced a recently completed project with Dillard's, Inc., to provide the retailer with a complete turn-key solution for placement and operation of 334 automated teller machines (ATMs) in Dillard's Department Stores throughout the U.S. The project involves all Dillard's stores in 29 states and was completed on schedule on November 4th.

The turn-key solution involves the in-store placement of ATMs from Triton, Inc. The ATMs accept all bankcards and most credit cards. Euronet will process the ATM transactions through the DASH Network using its own ARKSYSTM software brand.

"Providing ATM access in our stores is another way we can provide added services to our busy customers," said David Helm, Dillard's Assistant Treasurer. "By selecting DASH and Euronet as our ATM solutions provider, we were able to make this project happen quickly and efficiently, just in time for the holiday shopping season," Helm added.

"We're very pleased to have been selected by Dillard's," said Euronet Chairman and CEO, Michael Brown. "This is our first project with a retailer in the United States and it is a logical extension of the outsourced ATM network services Euronet has been offering in Europe."

Established in 1996, DASH provides transaction switching, and ATM and debit card services to 24 financial institutions in Arkansas, Louisiana, Oklahoma and Texas. Including the new Dillard's ATMs, the DASH network currently operates 446 customer-owned ATMs. DASH, located in Little Rock, Arkansas, is a subsidiary of Euronet.

Euronet Services Inc. is a leading provider of electronic financial solutions and transaction processing services. Euronet operates a network of over 2,000 ATMs in Europe and the U.S. and offers ARKSYSTM ITM software, an integrated software suite for electronic payment and transaction delivery systems compatible with the IBM AS/400 computer. With offices in eight countries on two continents, Euronet Services offers ATM network development and participation, outsourced management solutions, comprehensive software solutions, and professional and consulting services to retail banks and companies in more than 70 countries around the world.
